

the "classic" look

a graphics powerhouse...
unlimited design flexibility

**SEARCHING FOR A NEW AND
DISTINCTIVE LOOK? EXCLUSIVELY
FROM DOUGLAS CORPORATION...**

Only Douglas Corporation can provide you with this exciting and new alternative in nameplate graphics...our very own "Classic" look.

Capture the retro look of cloisonné and modernize it with a carbon fiber background. Marble, granite, and herringbone patterns...even clouds are now possible! The sky's the limit with our custom color deposition process. And durability—it's not even an issue! The "Classic" look is perfect for any outside or indoor environment.

The "Classic" look is excellent for small and intricate nameplates with fine copy and minimal overall thickness. Or, expand the entire process for a nameplate sized for the front of a truck or the side of a boat!

Once again, Douglas leads the way in new ideas for product graphics.
